

Care Instructions – Evening Dress with Variable Sleeves and Full Skirt

82% Virgin Wool (Cool Wool), 18% Silk

Navy with changeant effect

Made in Salzburg, Austria

196 g/m² | plain weave (Pettinato Unito)

Sustainability: Circular Fabric Standard

1. Cleaning

- **Cleaning recommendation:** for long-term care and preservation, **professional dry cleaning** is advised
- **Frequent cleaning is not necessary:** the wool-silk blend is naturally dirt-repellent and odour-neutralising. In most cases, airing the dress thoroughly after wearing is sufficient.

2. Storage

- Hang on a shaped hanger to maintain the shoulder structure and drape of the skirt.
- Store in a dry, well-ventilated space, away from direct sunlight.

3. Refreshing

- Light creases can be removed using a handheld steamer. Hold the device at a slight distance from the surface to avoid stressing the fabric.
- Avoid steaming while the sleeves are fixed in the back position to prevent tension in the material.

4. Ironing

- Iron on wool setting (max. 110 °C / 230 °F), without steam.
- Gently shape pleats and volume using the tip of the iron. Handle looped or tied sleeve elements with care to preserve their construction.

Why Cool Wool & Silk

This dress is made from a fine blend of virgin wool and silk, combining the unique qualities of both fibres:

- **Temperature-regulating:** Cool in warmth, insulating in cool conditions.
- **Breathable & moisture-wicking:** Supports a balanced skin climate.
- **Subtle sheen & depth:** The silk content creates a soft changeant effect.
- **Crease-resistant:** The natural elasticity of the fibres maintains the garment's shape.
- **Skin-friendly:** Smooth and soft against the skin, without itchiness.
- **Durable & low-maintenance:** Natural fibres are robust, regenerative and repairable.
- **Sustainable:** Wool and silk are renewable raw materials and fully biodegradable.
